## Two Way Tables - I ndependent Practice Worksheet

Complete all the problems.
After a series of matches between a school's teams and their rivals, the school secretary analyzed the relationship of the number of wins and matches played. The results are summarized in a two way table below.

| Sport | Boys Wins | Girls Wins | Total Wins |
| :---: | :---: | :---: | :---: |
| Volleyball | 23 | 18 |  |
| Cricket | 40 | 10 |  |
| Soccer | 15 | 25 |  |
| Total |  |  |  |

1. How many total wins did the school's Volleyball teams register?
2. How many more wins did the boys' teams have than the girls' teams?

The data is summarized in a two-way table for the number of boys and girls that regularly drink water, lemonade, or soda at lunch.

|  | Boys | Girls | Total |
| :--- | :---: | :---: | :---: |
| Water | 45 | 32 | 77 |
| Soda | 50 | 38 | 88 |
| Lemonade | 42 | 32 | 74 |
| Total |  |  |  |

Bound answers to nearestt tenth of a percent.
3. What is the percentage of boys that regularly drink water?
4. What is the percentage of girls that regularly drink water?
5. What is the percentage of girls that regularly drink soda?
6. What is the percentage of boys that regularly drink soda?
7. What is the percentage of the students that regularly drink water?
8. What is the percentage of the students that regularly drink soda?
